Eliminate Passwords!

SmartProfile is a Strong Multifactor SSO Solution that enables users to access workstations and applications quickly and securely with their fingerprints and/or access cards

SmartProfile, and related Verimetrics logos are trademarks of Verimetrics. All other trademarks or registered trademarks used within these pages are the property of their respective holders.

Verimetrics' SmartProfile™ is an authentication and enterprise Single Sign-On (eSSO) solution that allows organizations to improve data security and reduce IT support costs while improving user productivity.

Using state-of-the-art biometric algorithms and smart card technology, SmartProfile authenticates users with industry-leading precision and speed. This eliminates the need for remembering numerous passwords and speeds up the authentication process.

SmartProfile's innovative integration tools ensure automated authentication with any application. Wide ranging integration capabilities include support for legacy platforms such as AS-400 or Dos, in-house server applications on Unix, Mac, Linux or Windows operating systems, as well as hosted applications in a SaaS model. This unique capability differentiates SmartProfile™ from other eSSO or web SSO solutions that require manufacturer programming support to integrate new and complex applications.

SmartProfile has been securing confidential data for over a decade within North American hospitals, retail organizations, police forces and corporations of all sizes. In most cases, a return on investment (ROI) is attained within 2 to 4 months following deployment, providing exceptional value.

KEY BENEFITS

- » **Improved Productivity:** Multiple Passwords replaced by the user's fingerprint and/or card
- » **Increased Security:** Virtually eliminates unauthorized access to confidential data
- » **Traceability:** Successful and failed authentication reports provided
- » **Quick ROI:** Eliminates password management IT support costs
- » **Rapid Authentication:** Most authentications require less than a second
- » **Fast Implementation:** Simple and rapid installation and enrollment process

KEY FEATURES

- » **Supported applications and platforms:** DOS, Win32, Web, Windows 7@/Vista@/XP@, Thin Clients, Citrix@, VMware@, Windows Terminal Services@, Terminal Emulation
- » **Local fingerprint matching:** Enabling strong authentication within mobile environments, such as laptops, police vehicles and ambulances
- » **Centralized biometric and smartcard enrollment**
- » **Application and web authentication integration tool**

STRONG AUTHENTICATION AND SINGLE SIGN-ON SOLUTION FOR:
**HEALTHCARE, RETAIL, LAW ENFORCEMENT,
 CORPORATE, FINANCIAL (BANKING, INSURANCE),
 GOVERNMENT**

ADMINISTRATION CONSOLE

- » Secures confidential data
- » Improves productivity
- » Reduces support costs

ENROLLEMENT WIZARD

AUTHENTICATION

ELIMINATE PASSWORDS

Passwords have traditionally been used to secure access to computers and applications. However, passwords create a myriad of problems, including security vulnerabilities caused by password sharing and social engineering. Other problems include high IT support costs associated with creating and resetting passwords as well as user frustration caused by the proliferation and complexity of passwords.

SmartProfile allows organizations to eliminate passwords entirely, and use strong authentication technologies such as fingerprints and access cards. Enhance security, reduce costs and improve employee productivity all at once with SmartProfile.

SMARTPROFILE PROVIDES ROBUST SECURITY ENSURING CONFIDENTIALITY OF DATA WHETHER AT A SHARED, DEDICATED OR MOBILE WORKSTATION
